Cons:

[Mom wont ever understand and Dad will cry out in shame from the garage](#)

[Rating: Totally worth it.. This is a nice puzzle game with good pacing. New mechanics are taught through simple levels before being expanded upon and combined with previous ideas for greater challenges. The player must keep a "look before you leap" mindset while attempting to solve each puzzle. I found the puzzles to be well-designed and quite clever, but there are a few later challenges in which the player does not have enough information at first to reason through the entire puzzle, causing the player to potentially fail at least once in order to understand the puzzle in its entirety; however, the player has infinite attempts at each challenge. I really like the models for this game. They are fun and colorful and set a not-so-serious tone. In my opinion, the sound effects were somewhat loud compared to the background music, but the music itself was easy on the ears. Overall, this is an excellent game for patient thinkers with tender hearts. It is a joy to play, and I definitely recommend it.. This is one of the most amazing VR trips :\)](#)

[But unfortunately it's very short about 2h, for full price I think is too much, but for discount to 9.99 EUR for which I bought it it was perfect.. Just bought the game and had intense fun playing! Highly recommended! 1 hour just passed without me realising... -STEEL EMPIRE-](#)

[Its Gameplay and Controls feel great.](#)

[its Steampunky art style is superb and its Aged really well.](#)

[This Version ran absolutley fine and if ur looking to scratch that Shmup Itch then this will do it for you.](#)

[I wish alot more old retro style games were done as good as this.](#)

[Thanks guys for Bringing this to steam :D. "You are in a maze of twisty little portals, all alike". Not. Fun.](#)

Many crashes. Sim games are hard to make. Simulating real world physics and biological systems require expertise AND experience. For each subject.

Add to the complication that this game is entering a sub-genre with 2 already established titles battling for supremacy. That gives us a little perspective on what we can expect from a new entry.

Real Farm IS NOT yet a good game. It DOES have what it takes to be a good game, provided that we can do the work to help them get there. The price is too high right now and the game is closer to early access than Gold release. That's not a complaint against the developer, but rather the publisher who has to keep budgets and release dates balanced.

The good news is that the developers are using the sales to fund a rapid support schedule. The beta branch of the game is really cranking out the fixes and improvements. I'm quite optimistic that they will have a real new series contender here. If we are bold and brave as consumers. Nobody will ever make better games in this genre unless we buy the games. The genre needs to be making enough money for developers/publishers to want a piece of it. So buy the games, push developers to improve them and reap the rewards. If you want the farm game of the future, do the work now.

What the game does right: It's a lot like Farm Sim 16 if we are being honest. It has good music, decent art assets, the menus work well enough, etc.

What it does wrong currently: physics(wacky flipping/flying tractors over the mountains are possible), sound(hooking up tools is silent, no working sounds for many jobs, etc), no licensing(future games likely to have, provided people buy this), weather effects.

There is a good game here. If you want to push this game or other farm games to improve faster, there needs to be competition. That means you have to buy them all. Your move farm/sim gamers.. 1. For vive users, you need to lean a bit forward to use controller properly. I agree that the crossair position needs to be adjusted, but it is definitely playable in its current stage.

2. Game takes at least 2 hour to complete, and have a 15 mins exposition/tutorial. So when you see reviews with 0.4 hour played, it means they gave up half way through chapter 1.

3. It is a rail shooter because managing shield and various weapon systems will occupy both of your hands. If that 0.4 hour reviewer played a bit more and unlocked more weapons, he would understand how painful it would be to simultaneously holding up a shield, switching weapon with the other hand, and also manage movement all at the same time.. candy crush saga of the caribbean. Even though I haven't finished it, I've enjoyed the feel of the game. It is reminiscent of an older generation of games and that nostalgia factor worked for me. Definitely worth a look.. Similar to the Zuma series or Luxor, you shoot colored balls at a slowly moving ball-snake (my terminology) that is trying to get to a hole in the ground. If the ball-snake reaches the hole, you lose the level. After a few levels you get some power ups that randomly appear after making matches. Every 4 or 5 levels you get a key that lets you unlock more power ups. You can choose which power ups you want to unlock. It's always nice to have control over what special powers you have so you can play in your style. The levels get tougher as the game progresses: 2 ball-snakes at once, zig-zag paths that make it difficult to shoot balls where you want them, tunnels where you can't get at part of the ball-snake while it goes through, etc.

Power ups include:

Slow - always useful!

Backwards - the ball-snake creeps backwards for a few seconds

Shooter (I forget what it's called) - you shoot a fire dart, first only one but later you can upgrade to 3.

Blast - creates a big blast that takes out all balls in the area of the blast, small at first but can be upgraded

Orb of Decay - This is a good one, though it sounds like it would slowly decay them it actually does it instantly. A trail of black smoke destroys orbs in a certain area when you use this one.

And more that I have not unlocked yet.

The main gameplay area is shown as a map that you progress across (I can't remember if there was some kind of story).

There is also a Challenge area where you try to play levels as long as you can. Those unlock as you go along in the main map gameplay. I'm not sure if there are leaderboards or if you are just playing for your own record.

There are Achievements.

There are Trading Cards.

There are 3 Difficulty settings including "Nightmare" for those who want a challenge!

Graphics aren't the greatest (looks like a phone game) and the music is probably that free stuff but I just want to play, I don't care how things look and sound. There is one music track I like that is fun and quirky. I assume it randomly picks a track.

It's a great game for short bursts of play.

((For the record, I bought this on Steam with my own money.). While I enjoy the puzzles and love castles in general, the developer actually NEEDS you to use File Explorer to access puzzles 2 - 15. The game will only load the 1st puzzle over and over unless you double click the files from the steam app's common folder. I realize it's a dirt cheap game but COME ON.. i dont like it

glitchy and i dont enjoy the gameplay. The entire saga is just simply AMAZING!!! the plot of the story is wonderful with unique and out of this world characters (literally xD), and a kick-@ss soundtrack!! from the moment I started playing the first game I knew that I would love the rest of the series! there was never a dull moment playing the saga and I'd definitely recommend it to anyone who wants to try it out!

Kudos to Pilgrim Adventures!!! and I can't wait for the rest of the saga to continue! :D. Short but suspenseful point and click, gave me a few jump scares, playing in the dark !!. Frequent crashes but still enjoyed the game. Game play a bit clinky and not any real choices to be made, rather following a pre-determined storyline by minimal interaction.
