## About This Game

In Prey: Mooncrash, TranStar's secret moon base stopped transmitting shortly after the events of Prey. Now Peter, a hacker stationed aboard a spy satellite tasked with intercepting TranStar communications, must find out why. Trapped and under a ruthless contract with KASMA Corp, Peter's only hope of ever seeing his family again is uncovering the moon base's lost secrets.

Mooncrash includes Prey: Typhon Hunter, an online multiplayer update. Typhon Hunter is a lethal game of hide-and-seek between a single survivor (Morgan Yu) and five other players who stalk, hunt, and hide in plain sight as shape-shifting Mimic aliens. Every object is a potential enemy. Will Morgan or the Mimics prevail?

TranStar VR is a single player VR-only campaign included in the Typhon Hunter update. This campaign puts you in the shoes of various TranStar employees as you complete objectives and solve intricate puzzles on Talos I, just days before the events of Prey.

Requires the Prey full game.

I really liked Prey and this game may look the part at first but it isn't. I do not play multiplayer hide-and-seek games but, this was listed as a single player game as well (made the assumption that there would be some type of story line). Their idea of single player is just a multiplayer game with a bunch of arena type bots thrown in. Very disappointing...

. How do I play if I can't set the controls the way I like them?. This is an afterthought or outsourced, and it shows.

Awkward control changes from the source material, tiny locked FOV, and strange, simplistic combat.

It's part of Mooncrasher so this isn't the main reason you're buying it.

Ignore that this is in your library like everyone else does.
